DISCRETE MATHEMATICS

Author index to volume 143 (1995)

Dunham, D., D.S. Jungreis and D. Witte, Infinite Hamiltonian paths in Cayley digraphs of hyperbolic symmetry groups	(1–3)	1– 30
Fedou, J.-M. and D. Rawlings, Statistics on pairs of permutations	(1–3)	31– 45
Galeana-Sánchez, H., B_1- and B_2-orientable graphs in kernel theory (*Note*)	(1–3)	269–274
Griggs, J.R. and Y.-C. Lin, Planar graphs with few vertices of small degree	(1–3)	47– 70
Gross, J.L. and T.W. Tucker, Stratified graphs for imbedding systems	(1–3)	71– 85
Haviland, J., Independent domination in regular graphs (*Note*)	(1–3)	275–280
Hofmeister, M., Graph covering projections arising from finite vector spaces over finite fields	(1–3)	87– 97
Jungreis, D.S., see D. Dunham	(1–3)	1– 30
Komlós, J. and W.O.J. Moser, Almost all trees have tribe number 2 or 3 (*Note*)	(1–3)	281–285
Kountanis, D., see B.P. Mull	(1–3)	209–220
Labahn, R., Kernels of minimum size gossip schemes	(1–3)	99–139
Lai, H.-J. and G. Weng, Strength and fractional arboricity of complementary graphs	(1–3)	141–151
Lin, Y.-C., see J.R. Griggs	(1–3)	47– 70
Liu, G., Orthogonal (g,f)-factorizations in graphs	(1–3)	153–158
Liu, J. and K. Williams, On bandwidth and edgesum for the composition of two graphs	(1–3)	159–166
Metsch, K., Quasi-residual designs, $1\frac{1}{2}$-designs, and strongly regular multigraphs	(1–3)	167–188
Miao, Y. and L. Zhu, Perfect Mendelsohn designs with block size six	(1–3)	189–207
Moon, J.W., see S. Tazawa	(1–3)	287–291
Moser, W.O.J., see J. Komlós	(1–3)	281–285
Mull, B.P., D. Kountanis, and R. Rashidi, Uniform strong 2-cell imbeddings of bridgeless graphs	(1–3)	209–220
Nara, C., see S. Tazawa	(1–3)	287–291
Rashidi, R., see B.P. Mull	(1–3)	209–220
Rawlings, D., see J.-M. Fedou	(1–3)	31– 45
Shen, X., Generalized Latin squares II	(1–3)	221–242
Su, X.-Y., On complete subgraphs of color-critical graphs	(1–3)	243–249
Tazawa, S., C. Nara, and J.W. Moon, The number of 4-cycles in triangle-free oriented graphs (*Note*)	(1–3)	287–291
Tucker, T.W., see J.L. Gross	(1–3)	71– 85
Ulatowski, W., Cycle interpolation properties of graphs	(1–3)	251–257
Weng, G., see H.-J. Lai	(1–3)	141–151
Williams, K., see J. Liu	(1–3)	159–166
Witte, D., see D. Dunham	(1–3)	1– 30
Yan, L., A Family of special outerplanar graphs with only one triangle satisfying the cycle basis interpolation property (*Note*)	(1–3)	293–297
Zang, W., Generalizations of Grillet's theorem on maximal stable sets and maximal cliques in graphs	(1–3)	259–268
Zhu, L., see Y. Miao	(1–3)	189–207
